DIGITAL 2025: EVER MORE CONNECTED

All of the signs point to 2025 being another “bumper year” in connected tech, with rapid advances in AI, the evolving social media landscape, and broadening online behaviours all gearing up to reshape the digital landscape over the coming months.

Moreover, the data in this latest update to our [Global Digital Reports series](#) shows that we’re living increasingly “connected” lives. For example, we’re using the internet for an ever wider range of activities and tasks, and we’ve seen the amount of time that people spend online edge back up over recent months too.

Finding information remains the top motivation for using the internet, and – despite frequent misrepresentation in the media – young people are just as likely as ever to use search engines. However, we’re also seeing search behaviours evolve, and a greater number of people are adding more varied sources of information to their online research activities.

Trends suggest that AI will become increasingly important for search during the months ahead, but it’s also interesting to see that the world is increasingly turning to social media to find inspiration, to learn about brands, and to research potential purchases.

Looking beyond our seemingly insatiable appetite for information, the latest data also show that more and more people are using connected devices and services to connect with the people they care about, to stay up to date with current affairs, and to access entertainment.

Social networks and messaging platforms are still the most popular destinations on the internet, with more than 97 percent of connected adults saying that they visit at least one social platform every month. However, we’ve seen some interesting changes in social media behaviours and preferences in this year’s data, with important differences playing out across geographies and demographics.

The world’s internet users are also moving more of their shopping online, with an increasing number of ecommerce users spending more money across a wider variety of product categories. Similarly, trends in online grocery activity suggest that we’ll be shopping online more frequently in 2025 too. But online commerce isn’t confined to consumer goods; it’s also helping us navigate the physical world, with internet users spending more money to book planes, trains, and automobiles.

Meanwhile, the lines between TV and the internet continue to blur, with nearly all internet users now watching streaming content every month. We’re also seeing a greater number of people access internet content via their TV set, perhaps because ever fewer of us access the internet via laptops and desktops. People aren’t just watching content on the big screen though, and data shows that video now accounts for more than three-quarters of the traffic sent over cellular data networks.

But it’s also interesting to see the enduring appeal of various online activities and brands. For example, email continues to gain popularity, even amongst younger audiences. And perhaps most strikingly – despite pervasive AI hype and headlines – the latest data suggests that a greater number of people still use Yahoo! than use ChatGPT.

That’s just a small selection of the insights that you’ll find in this year’s reports, but it’s probably better if I let the data do the rest of the talking. I hope you find our [full suite](#) of Digital 2025 reports valuable, and that the data they contain helps you take full advantage of the opportunities that this “bumper year” should bring.

IMPORTANT NOTES ON COMPARING DATA

The findings published in this report use the latest data available at the time of production. This may include revised figures for historical data points that were not available when we produced previous reports in the Global Digital Reports series. From time to time, we may also change the data sources that we use to inform specific data points, and we may also change how we calculate certain values. Similarly, our data partners may change the ways in which they source, calculate, or report the data that they share with us. As a result, findings published in this report **may not correlate** with findings published in our previous reports, especially where such findings represent change over time (e.g. annual growth). Where we report figures for change over time, such figures will use the latest available data, so we recommend using

the **values published in this report**, rather than trying to recalculate such values using data from previous reports. When we're aware of the potential for historical mismatches, we include a note on **comparability** in the footnotes of each relevant slide. Where we include such advisories, or where we report values for change over time as "[N/A]", the most recent data **do not correlate** with the equivalent data point(s) published in previous reports, so we **strongly advise readers not to compare** these figures with equivalents published in previous reports. In particular, the social media platforms featured in this report regularly revise the figures that they report for advertising reach, and this may result in the latest numbers appearing to be lower than the values for the same data points published in our previous reports. However, these revisions

do not necessarily imply any change in the active use of these platforms, and should not be interpreted as such. Furthermore, in addition to changes in data sources and calculations, please note that the figures we publish for "social media user identities" **may not** represent unique individuals. This is because some individuals may manage multiple social media accounts, and because some social media accounts may represent 'non-human' entities (e.g. businesses, animals, music groups, etc.). As a result, the figures we publish for social media user identities may **exceed** the figures that we publish for total population or for individuals using the internet, but such anomalies do not represent mistakes. For more information, please read our notes on data variance, mismatches, and curiosities: <https://datareportal.com/notes-on-data>.

SOURCES: KEPIOS ANALYSIS; ITU; GSMA INTELLIGENCE; EUROSTAT; GOOGLE'S ADVERTISING RESOURCES; CNNIC; KANTAR & IAMAI; GOVERNMENT RESOURCES; UNITED NATIONS. TIME SPENT AND MOBILE SHARE DATA FROM [GWI](#) (Q3 2024). **NOTES:** GENDER DATA ARE ONLY AVAILABLE FOR "FEMALE" AND "MALE". PERCENTAGE CHANGE FIGURES SHOW RELATIVE YEAR-ON-YEAR CHANGE. "BPS" FIGURES REPRESENT BASIS POINTS, AND SHOW ABSOLUTE YEAR-ON-YEAR CHANGE. **COMPARABILITY:** SOURCE AND BASE CHANGES. ALL FIGURES USE THE LATEST AVAILABLE DATA, BUT SOME SOURCES DO NOT PUBLISH REGULAR UPDATES, SO FIGURES MAY UNDER-REPRESENT ACTUAL USE. SEE [NOTES ON DATA](#).

GWI's top trends for 2025

01

Podcasts are shaking up the ad game

For the very first time, consumers prefer podcasts to radio, and they're eating up a bigger slice of the audio market. Brands now have a unique opportunity to reach premium product buyers when they're highly engaged.

02

Side hustles are the new norm

Over 1 in 10 business professionals now have side hustles, including 38% of VPs and above. While companies can't cater to everyone, embracing new ideas can keep side hustlers motivated.

03

Women's sports are taking the center court

In the US, women's sports are seeing a surge in popularity, especially on the basketball court. Brands that target these captive audiences and elevate female players can turn today's momentum into lasting growth.

04

Energy drinkers have a different look

With 46% of consumers enjoying energy drinks every month, new audiences offer brands opportunities to refresh and diversify product lines. Marketing to dietary and lifestyle preferences is key to boosting sales.

05

Teens are rethinking the college dream

The number of US teens who say college is important has dropped 21% since 2021. Businesses should consider whether traditional degrees are really necessary in shaping the future workforce.

06

Smart security sales are sneaking up

Ownership of smart security devices (e.g. video doorbells) has overtaken smart utility products (e.g. smart lights), growing 58% since 2019. Taking lifestyle indicators into account will help brands target new groups.

INTERNET ADOPTION

INDIVIDUALS USING THE INTERNET AS A PERCENTAGE OF TOTAL POPULATION

GLOBAL OVERVIEW

DATA REPORTAL

The State of Mobile Internet Connectivity 2024

[Download the report](#)

gsmaintelligence.com

4.6 billion

The number of people using mobile internet on their own device.

Around 160 million people started using mobile internet in 2023, which is similar to the growth in 2022 but represents a slowdown compared to 2015–2021.

A further 730 million individuals used mobile internet on a device they do not own or have primary use of. While access on a shared or other person's device represents an important mode of access for many children, it is more limiting for adults; they are unable to realise the full benefits of mobile internet if they only have temporary, shared or intermittent access.

3.1 billion

The number of people that live within the footprint of a mobile broadband network but are not using it.

With mobile internet adoption outpacing network expansion, this usage gap has continued to shrink. However, the usage gap is now nine times the size of the coverage gap and two thirds of the usage gap population do not yet own a mobile phone of any type.

For those already aware of mobile internet, the top-reported barriers to adoption are affordability (primarily of handsets) and literacy & digital skills.

\$3.5 trillion

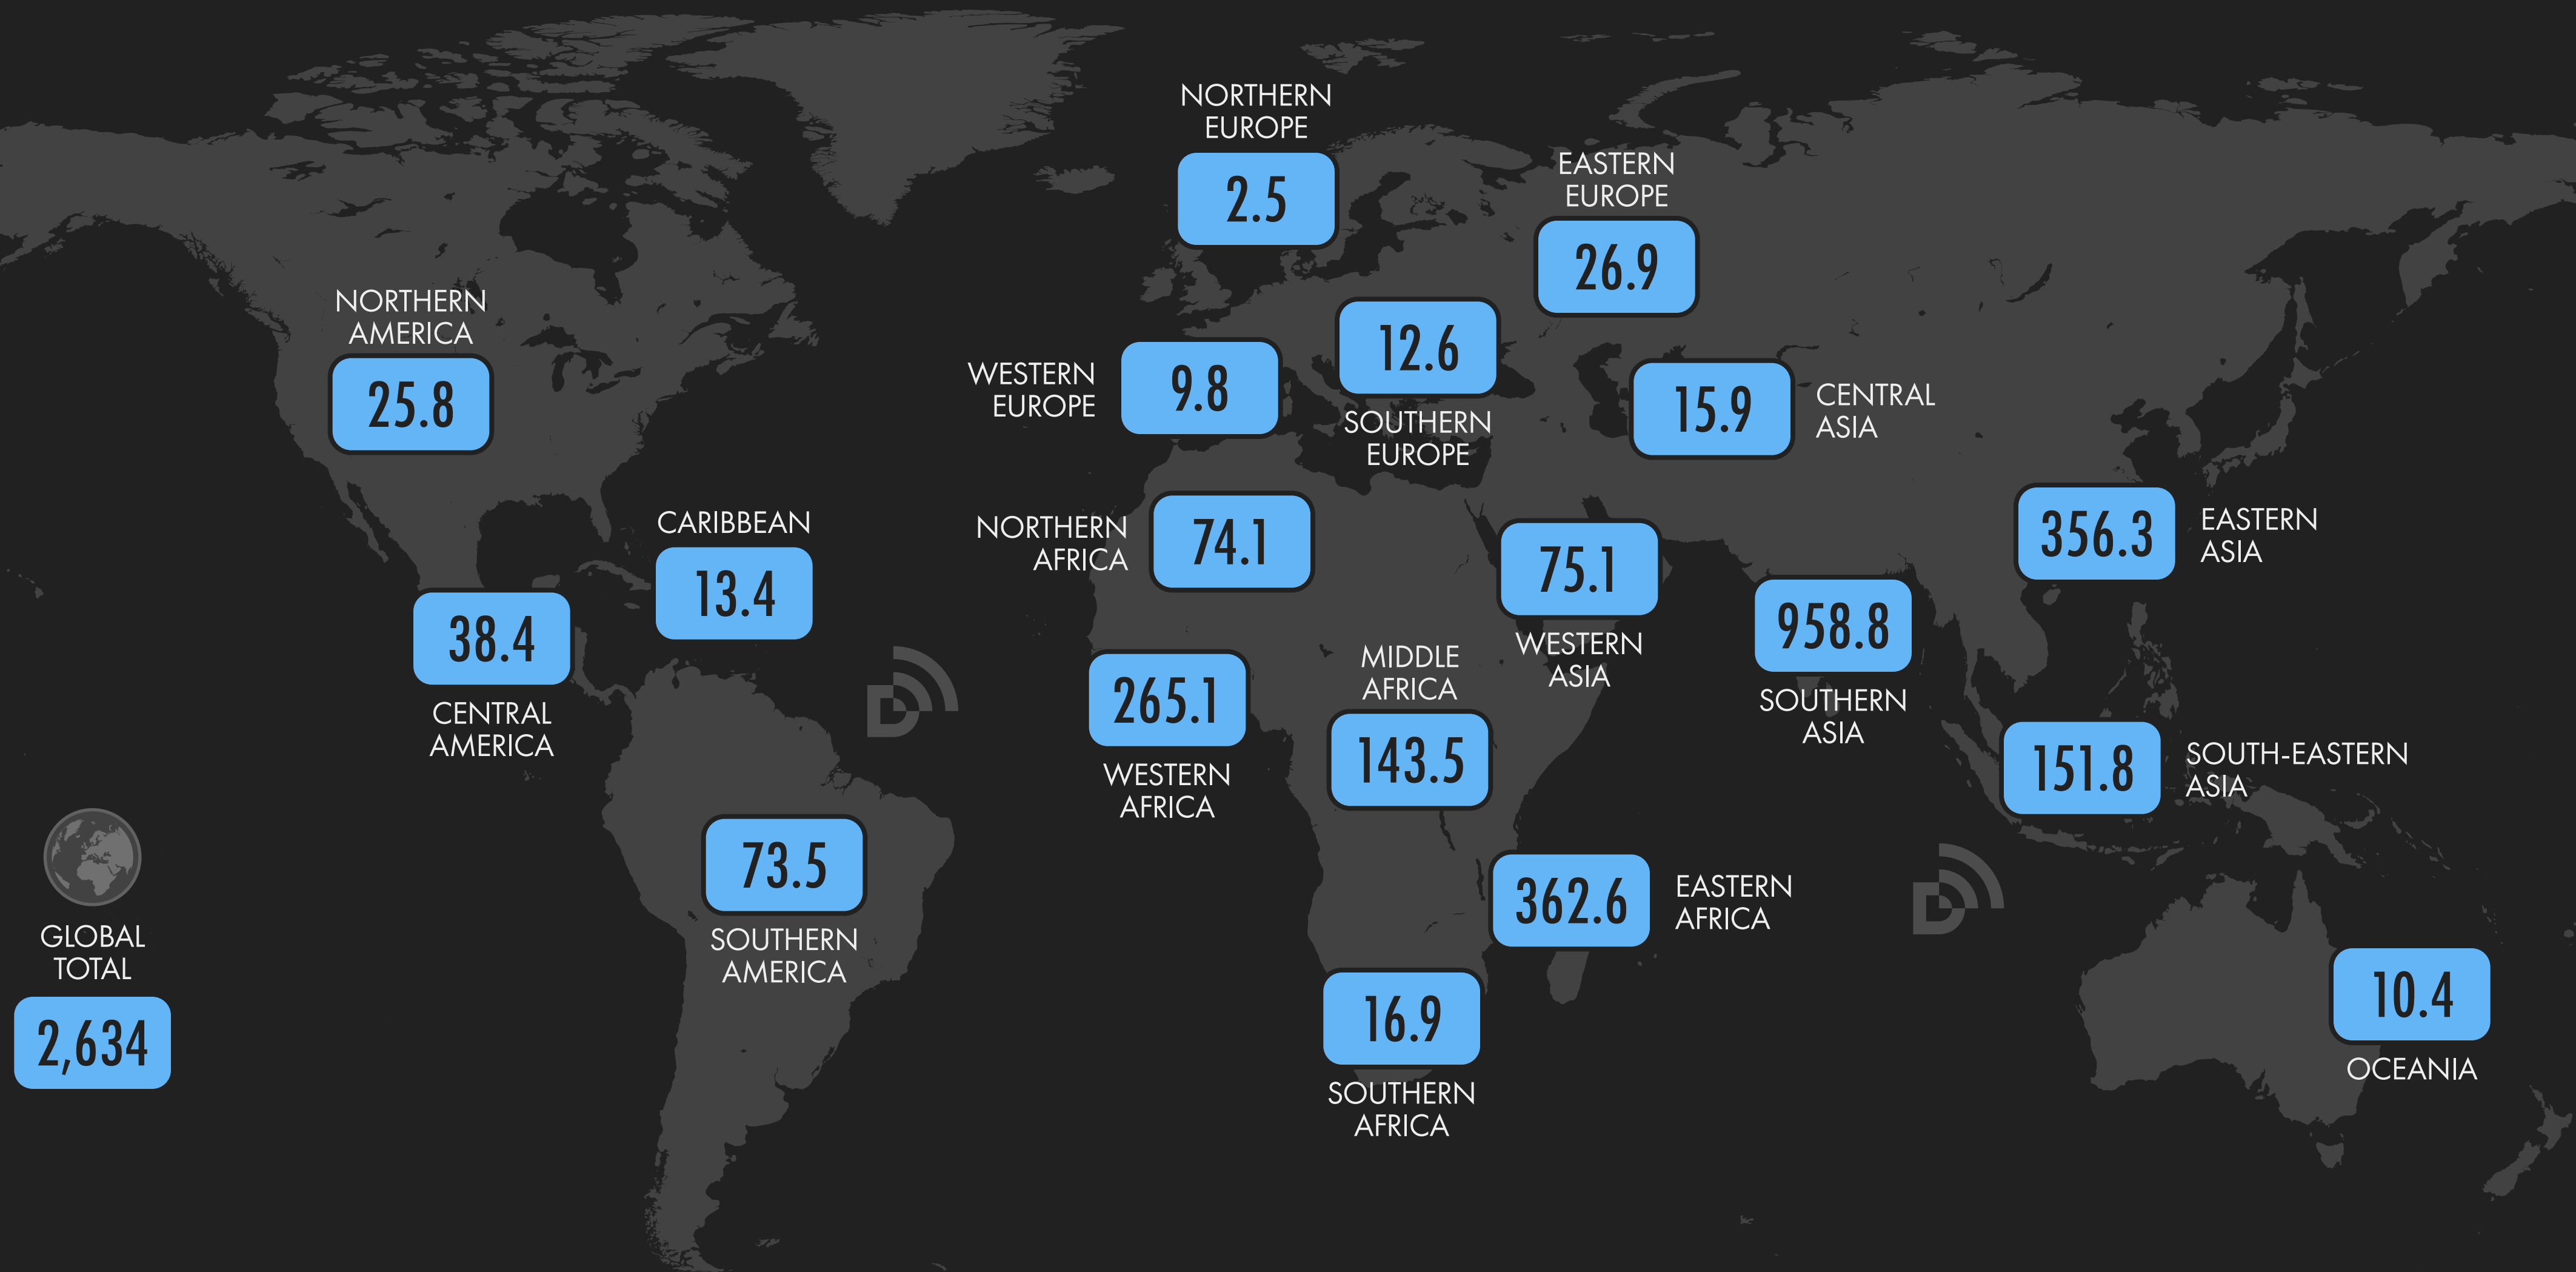

The additional global GDP that could be added in 2023-2030 from closing the usage gap.

More than 90% of this benefit would accrue to low- and middle-income countries, given they account for the vast majority of the unconnected. Just over \$1.3 trillion in total additional GDP over the period would come from closing the gender gap in mobile internet adoption across low- and middle-income countries.

FEB
2025

UNCONNECTED POPULATIONS

NUMBER OF INDIVIDUALS (IN MILLIONS) WHO DO NOT USE THE INTERNET

UNCONNECTED POPULATIONS

COUNTRIES AND TERRITORIES WITH THE LARGEST UNCONNECTED POPULATIONS AND THE LOWEST LEVELS OF INTERNET ADOPTION

DEVICES USED TO ACCESS THE INTERNET

PERCENTAGE OF INTERNET USERS AGED 16+ WHO USE EACH KIND OF DEVICE TO ACCESS THE INTERNET

GLOBAL OVERVIEW

FEB
2025

SHARE OF DAILY INTERNET TIME BY DEVICE (YOY)

DAILY TIME THAT INTERNET USERS AGED 16+ SPEND USING THE INTERNET ON EACH DEVICE AS A PERCENTAGE OF TOTAL DAILY INTERNET TIME

GLOBAL OVERVIEW

SOURCE: GWI (Q3 2024). **NOTES:** "MOBILES" INCLUDES SMARTPHONES AND FEATURE PHONES. "COMPUTERS" INCLUDES LAPTOPS, DESKTOPS, AND TABLET DEVICES. PERCENTAGES IN THE WHITE CIRCLES SHOW THE RELATIVE CHANGE IN MOBILE'S SHARE OF TOTAL INTERNET TIME vs. THE PREVIOUS PERIOD (I.E. AN INCREASE OF 20% FROM A STARTING VALUE OF 50% WOULD EQUAL 60%, NOT 70%).

COMPARABILITY: CHANGES IN AUDIENCE COMPOSITION AND SURVEY METHODOLOGY. SEE [NOTES ON DATA](#).

MODERN MYTHMAKING

Move over, traditional media; creator-led content now leads the way in responding to (and shaping) popular culture. The result? An Easter egg web in which audiences are digging deeper into entertainment than ever before.

Social Media Marketing Trends

Social Networks Overtake Linear TV

People now spend more time on social media than watching conventional TV, marking an important shift in media consumption. Though TV time is declining, video is still as important as ever, with platforms like TikTok and YouTube letting us watch on our own terms.

Creator Economy Boom

Social networks depend on content creators to draw audiences, engagement, and brands. In the hopes of attracting and retaining top creators, platforms are rolling out more monetization resources. In turn, creators are increasingly demanding fairer compensation.

Organic Content's Comeback

A slew of recent viral brand social media posts have proven that organic reach isn't dead. Clever organic content and careful trendjacking can drive visibility as much as any paid campaign. Strike a careful balance between pay-to-play and organic strategies for maximum success.

Discover what's next for marketing.

Uncover the 15 trends transforming the industry this year in Meltwater's 2025 Marketing Trends Guide.

We are a global socially-led creative agency, with unrivalled social media and influencer marketing expertise.

With over 1,200 people in four continents, we deliver a global perspective to our clients in a time when social media is shaping culture.

We make ideas worth talking about. We understand social behaviours within online communities, cultures and subcultures, spanning the social and gaming landscape. We build influencer partnerships with impact.

We work with the world's biggest brands, including adidas, Samsung, Netflix and Google, to reach the right people in a strategic, relevant and effective way.

We Are Social is part of Plus Company.

Turning data into **intelligence**

GSMA
Intelligence

gsmaintelligence.com

GSMA Intelligence is the definitive source of mobile industry insights, forecasts, and research, used around the world. Our insights cover every mobile operator, network, and MVNO in every country worldwide.

What do we **do**?

- Comprehensive Data Platform
- Insightful Research
- Expert Analysis
- Bespoke Consulting
- Event Support
- Spectrum Navigator Platform

What **topics** do we cover?

Our research modules include the following:

- Mobile Operators & Networks
- IoT & Enterprise
- Digital Consumer
- Fixed, TV & Convergence
- Spectrum

From automation and gaming, to sustainability, private wireless, and regional trends, our team have expertise in all parts of the wider mobile ecosystem.

Who do we work with?

Actively working with the **1,100+** GSMA members, serving the wider mobile ecosystem:

Mobile Network Operators

Regulatory Bodies

Government Departments

Financial Corporations

Cybersecurity Firms

OEMs and Manufacturers

Technology Companies

Consulting Businesses

7/10

Forbes top digital companies worldwide rely on our data and insights

50

million individual datapoints covering everything from operational to economic metrics

FORECASTED UP TO

2030

allowing you to identify, understand and enhance your business strategies

Provides the most accurate,
comprehensive, and actionable
Digital Data, so every business
can win their market

Refreshed Data

Data. Insights. Impact.

Semrush .Trends empowers businesses to scale by delivering data revealing market dynamics, emerging trends, and competitor strategies.

.Trends data enhances growth-focused marketing strategies that maximize ROI and minimize acquisition costs.

→ **Grow your business** with unparalleled global data covering 95% domains across +190 countries.

→ **Stay ahead of rivals** with trend forecasting and benchmarking powered by daily data and over 7 years of detailed historical analysis.

→ **Fuel precise decision-making** with 500TB of raw data collected from 200M real internet users across 1B daily events.

data.ai

data.ai unlocks insights at every stage of the customer lifecycle

Acquisition

Supercharge or unearth winning acquisition and ASO strategies with top class market evaluation tools.

Engagement

Boost user playtime or streaming by evaluating and implementing market leading engagement features and insights.

Monetization

Get the full picture with in-app purchase and advertising revenue metrics that inform your own monetization strategies.

Retention

Utilize world class usage metrics to drill into short and long term returning users and learn how to avoid retention crashing pitfalls.

**Better data.
Better insights.
Better outcomes.**

NOTES ON DATA VARIANCE, MISMATCHES, AND CURIOSITIES

Note: This page is a summary of our comprehensive notes on data variance, potential mismatches, and curiosities, which you can read in full at <https://datareportal.com/notes-on-data>.

This report features data from a wide variety of different sources, including market research agencies, internet and social media companies, governments, public bodies, news media, and private individuals, as well as extrapolations and analysis of that data.

Wherever possible, we've prioritised data sources that provide broader geographical coverage, in order to minimise potential variations between data points, and to offer more reliable comparison across countries. However, where we believe that standalone metrics provide a more reliable reference, we use such standalone numbers to ensure more accurate reporting.

Please note that some data points may only be available for a limited selection of countries, so we may not be able to report the same data in all reports.

From time to time, we may also **change the source(s)** that we use to inform specific data points. As a result, some figures may appear to change in unexpected ways from one report to another. Wherever we're aware of these changes, we include details in the

footnotes of each relevant chart, but please use caution when comparing data from different reports, because changes to research samples, base data, research methodologies, and approaches to reporting may mean that values are **not comparable**.

Furthermore, due to the differing data collection and treatment methodologies, and the different periods during which data have been collected, there may be significant differences in the reported metrics for similar data points throughout this report. For example, data from surveys often varies over time, even if that data has been collected by the same organisation using the same approach in each wave of their research.

In particular, reports of internet user numbers vary considerably between different sources and over time. In part, this is because there are significant challenges associated with collecting, analysing, and publishing internet user data on a regular basis, not least because research into public internet use necessitates the use of face-to-face surveys. Different organisations may also adopt different approaches to sampling the population for research into internet use, and variations in areas such as the age range of the survey population, or the balance between urban and rural respondents, may play an important role in determining eventual findings. Note that COVID-19 has limited internet user research.

Prior to our Digital 2021 reports, we included data sourced from social media platforms' self-service advertising tools in our calculations of internet user numbers, but we **no longer include this data** in our internet user figures. This is because the user numbers reported by social media platforms are typically based on **active user accounts**, and may not represent unique individuals. For example, one person may maintain more than one active presence (account) on the same social media platform. Similarly, some accounts may represent 'non-human' entities, including: pets and animals; historical figures; businesses, causes, groups, and organisations; places of interest; etc.

As a result, the figures we report for social media users may **exceed** internet user numbers. However, while this may seem counter-intuitive or surprising, such instances do not represent errors in the data or in our reporting. Rather, these differences may indicate delays in the reporting of internet user numbers, or they may indicate higher instances of individuals managing multiple social media accounts, or 'non-human' social media accounts.

If you have any questions about specific data points in these reports, or if you'd like to offer your organisation's data for consideration in future reports, please email our reports team: reports@kepios.com.

DISCLAIMER AND IMPORTANT NOTES

This report has been compiled by Kepios Pte. Ltd. ("Kepios") on behalf of We Are Social Ltd. ("We Are Social") for informational purposes only, and relies on data from a wide variety of sources, including but not limited to public and private companies, market research firms, government agencies, NGOs, and private individuals.

While Kepios and We Are Social strive to ensure that all data and charts contained in this report are, as at the time of publishing, accurate and up-to-date, neither Kepios, nor We Are Social, nor any of those organisations' partners, suppliers, affiliates, employees, or agents shall be responsible for any errors or omissions contained in this report, or for the results obtained from its use.

All information contained in this report is provided "as is", with no guarantee whatsoever of its accuracy, completeness, correctness or non-infringement of third-party rights and without warranty of any kind, express or implied, including without

limitation, warranties of merchantability or fitness for any particular purpose.

This report contains data, tables, figures, maps, flags, analyses and technical notes that relate to various geographical territories around the world, however reference to these territories and any associated elements (including names and flags) does not imply the expression of any opinion whatsoever on the part of Kepios, We Are Social or any of the featured brands, nor any of those organisations' partners, affiliates, suppliers, employees or agents, concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

This report is provided with the understanding that it does not constitute professional advice or services of any kind and should therefore not be substituted for independent investigations, thought or judgment. Accordingly, neither Kepios, nor We Are Social, nor any of the brands or organisations featured or cited herein, nor

any of their partners, affiliates, suppliers, group companies, employees or agents shall, to the fullest extent permitted by law, be liable to you or anyone else for any direct, indirect, punitive, incidental, special, consequential, exemplary or similar loss or damage, or loss or damage of any kind, suffered by you or anyone else as a result of any use, action or decision taken by you or anyone else in any way connected to this report or the information contained herein, or the result(s) thereof, even if advised of the possibility of such loss or damage.

This report may contain references to third parties, however this report does not endorse any such third parties or their products or services, nor is this report endorsed by or associated with such third parties.

This report is subject to change without notice. To ensure that you have the most up-to-date version of this report, please visit our reports website at <https://datareportal.com/>.
